Description of the Program, including courses taught and other relevant information for the applicants.

Currently second largest FFA chapter in NYS. 530 student K-12 building. Primarily a plant production foundation now, but we are open to considering the candidate's strengths and ideas. Excellent facilities and equipment, strong and well established program. Intensely supported by the community. 24 acre land lab attached to property, glacial fed lake adjacent to property, greenhouse attached to shop, small animal lab, and ample opportunities to partner w/ science program. Ideally, we would like a dual certification. Courses currently taught include: ag mechanics, intro to ag, basic ag, advanced ag, plant production, etc. Opportunities for new course development exist. Summer work is expected.
